CERTIFIED CHECKLIST

February 24, 2006

CHECKLIST SUBMITTAL INSTRUCTIONS:

This checklist procedure may be used in lieu of a complete department review when the conditions listed below are met. Checklist submittals can only be used for water main extensions or replacements. Construction is unlawful until approval of the checklist is granted by the department, normally issued in a letter to the design engineer submitting the plans and specifications. Use of the main is unlawful until the department receives as-builts or a certifying letter in accordance with ARM 17.38.101. The department must approve any deviation requests. Normally, complete submittals will be reviewed by the Department within 10 working days. Deviation requests may result in slower turn-around.

Required Documentation: *Checklists submitted without all of the required documentation will be considered incomplete and will not be processed until all of the required information has been submitted.*

1. A certified checklist form signed and stamped by the professional engineer responsible for the design of the project. All sections of the certified checklist must be completed.
2. Three sets of plans and specifications stamped and signed by the professional engineer responsible for the design of the project.
3. An engineering report presenting, at a minimum, the information required in section 1.1.1 through 1.1.14. of DEQ-1. The engineering report must include all applicable analysis and supporting assumptions, such as fire flows, etc.
4. A map showing the location of the proposed water main in relation to the rest of the distribution system and the sewer collection system.
5. Owner certification that a professional engineer will be retained for construction inspection and will certify completion in accordance with the approved plans and prepare as-builts for submittal to the department within 90 days of project completion.
6. An approval letter from a professional engineer (other than the design engineer) who is employed directly or retained by the owner of the public water system providing service to the proposed water main. The letter must state the system approves of the extension and the system has adequate capacity and pressure to accommodate the extension. Signature on the Municipal Facilities Exclusion checklist does not fulfill this requirement. This approval letter is not required if:
 - a. The proposed water main extension is part of a water utility master plan previously approved by the department within the past ten years, and the department concurs the master plan appropriately covers the extension. A copy of the applicable portion of this master plan must be submitted with the checklist; or
 - b. The water main replaces an exiting main and is equal to or greater than the existing pipe. An approval letter from the owner of the system providing service must be submitted with the checklist.

The fee for processing each certified checklist is \$100.00 and must be included with the submittal. The fee for processing each deviation is \$100 and must be included with the deviation request. Completed checklist submittals may be mailed to: Department of Environmental Quality, Permitting & Compliance Division, Community Services Bureau, Metcalf Building, P.O. Box 200901, Helena, MT 59620-0901; or for those systems served by the Billings Office: Department of Environmental Quality, Community Services Bureau, Airport Business Park 1P-9, 1371 Rintop Drive, Billings, MT 59105-1978. Questions can be answered by writing the above address or calling (406) 444-4400 in Helena and (406) 247-4445 in Billings.
